COMMUNITY CHURCH

Podcast Instructions

First, let's start with what you need to listen with iTunes. Most importantly...you don't need an iPod. You can listen with just a computer. But to use iTunes (for free) you'll have to own a reasonably new computer.

Listed below are the minimum requirements. If you think your computer doesn't meet these requirements, see Andrew. It might still work.

Macintosh Requirements:

- \* Mac OS X 10.2.8 or later
- \* 500MHz G3 processor or better
- \* QuickTime 6.5.2 or later
- \* 256MB RAM
- \* Combo/Super Drive to burn CDs
- \* Broadband Internet connection (DSL/Cable/LAN) for buying and streaming music

Windows Requirements:

- \* Windows XP or 2000 (latest service packs recommended)
- \* 500 MHz Pentium class processor or better
- \* QuickTime 7.0.4 (included)
- \* 256MB RAM
- \* Supported CD-R or DVD-R drive to burn CDs
- \* Broadband Internet connection (DSL/Cable/LAN) for buying and streaming music

Now that you know if your computer will work, you can begin by downloading and installing iTunes at:

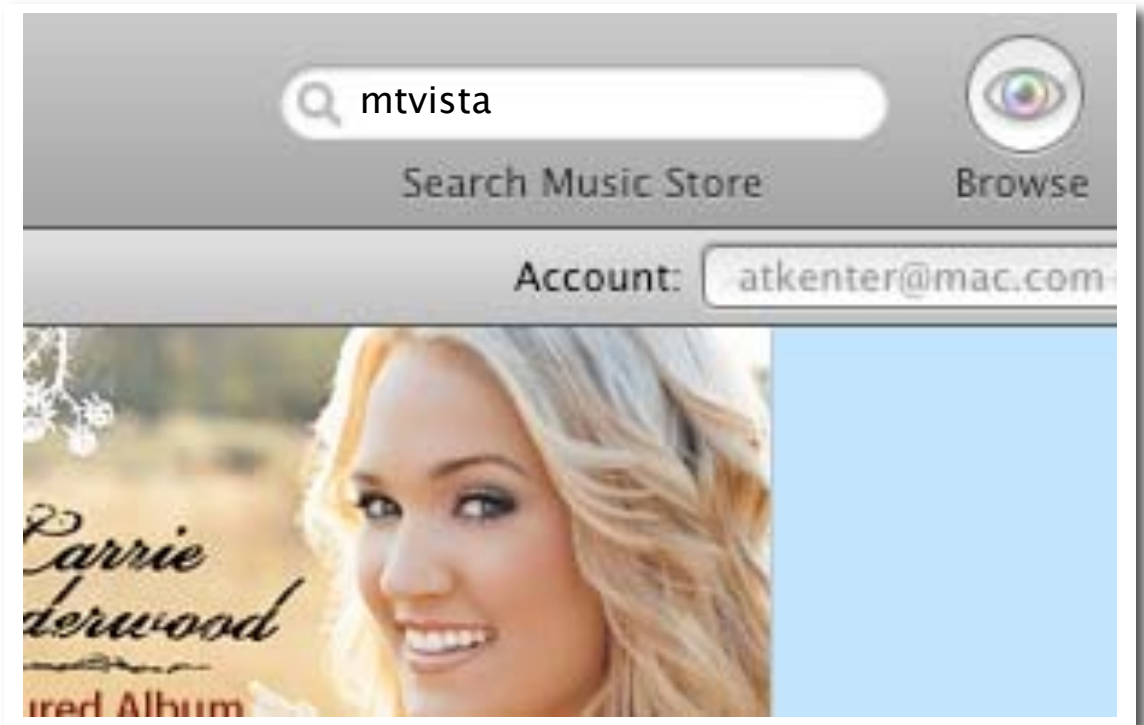

<http://www.apple.com/itunes/download/>

If you have a Mac you won't need to download the program because it comes standard on new Macs.

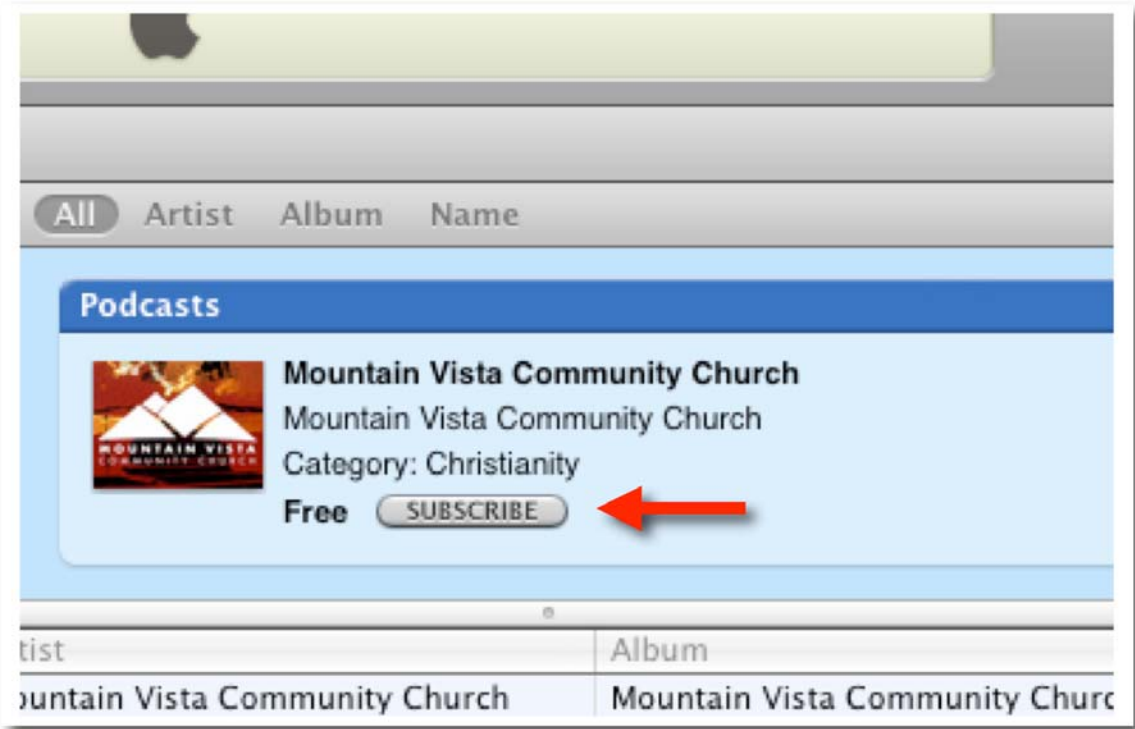

Now, open iTunes and click Music Store on the left.

After the store loads, find the search bar at the upper left and type "mtvista"

When the new page loads, click subscribe.

iTunes will automatically begin downloading our Podcast, as well as any future episodes. Depending on the size of the episode it can take a few minutes to fully download so you can listen. To find downloaded Podcasts just hit the Podcast button on the left of the iTunes window.
